JIM GREEN FOOTWEAR

FOOTWEAR WITH ATTITUDE

WORKWEAR AND
HIKING RANGE

B3 HIGHLANDER HIKING BOOT

- Manufactured with a single layer of 2.2mm full grain leather
- Thermoplastic toe puff and a heel stiffener for extra support
- Ankle padding for excellent support, comfort and protection
- A steel shank between the insole board and sole offers extra support and stability
- Insole board is secured to the upper with a double stitched 2.2mm braided nylon cord
- Accommodates a wider foot with a roomy toe box
- Sole is made from a genuine rubber
- Can be resoled
- Versatile design makes it a great all-rounder, from the work place to the outdoors.

FEATURES

B6 RAZORBACK

- Manufactured with a double layer of leather (2.2mm full grain leather, lined with 1.8mm calf leather)
- Double layer of leather aids in the boots water resistant properties (not waterproof)
- Ankle padding for excellent support, comfort and protection
- Thermoplastic toe puff and a heel stiffener for extra support
- A steel shank between the insole board and sole offers extra support and stability
- Insole board is secured to the upper with a double stitched 2.2mm braided nylon cord
- Sole is made from a genuine rubber and can be resoled
- Due to the double layer of leather the Razorback can tackle all kinds of terrain, making it ideal for the outdoor worker or hiker requiring that extra bit of toughness.

FEATURES

BC BUSHCAT

- This boot supports a lower cut around the ankle than the rest of the range
- Manufactured with a double layer of leather (2.2mm full grain leather, lined with 1.6mm calf leather)
- Double layer of leather aids in the boots water resistant properties (not waterproof)
- Ankle padding for excellent support, comfort and protection
- Thermoplastic toe puff and a heel stiffener for extra support
- A steel shank between the insole board and sole offers extra support and stability
- Insole board is secured to the upper with a double stitched 2.2mm braided nylon cord
- Sole is made from a genuine rubber and can be resoled
- With the durability and lower cut around the ankle, the Bushcat is perfect for those on their haunches most part of the day or for those not requiring the additional ankle support of the Razorback.

FEATURES

F3 STOCKMAN

FEATURES

- Perfect for those who are always on the move and a favorite amongst the farming community
- Manufactured with a double layer of leather (2.2mm full grain leather, lined with 1.6mm calf leather)

PRODUCT SPECS

Jim Green Footwear is as hard, resilient and tough as Africa. The look, style and fit is carefully fashioned to embrace the personalities of those that wear them. The Footwear is perfect for any occasion and designed to fit around an active lifestyle.

A Boots are made from 2.2mm leather with heavy duty hooks and eyelets

B Ankle padding for excellent support, comfort and protection

C Thermoplastic toe cap and heel stiffener

D All styles have a steel shank and an insole board that offers extra support and stability

E 2mm braided nylon cord is used for double stitching

F Pure rubber sole

All these processes are carefully molded together, making Jim Green South Africa's most successful brand of outdoor footwear.

PRODUCT CARE

- The key to getting maximum usage from your pair of Jim Green's is to take good care of them. The best way to preserve your footwear is through regular polishing and correct care.
- Do not dry near a fire, heater or in direct sunlight – when boots are wet stuff with newspaper, shape and leave to dry naturally. When dry, polish.
- We recommend a bees wax or any natural shoe polish found at your local store. Regular polishing also seals the leather, aiding the boots water resistant qualities.
